

Waterloo Street Birmingham

Proici commercial interiors completed the design & refurbishment of the WC's over seven floors of a 1920's office building in Waterloo Street, Birmingham. Our designers worked closely with the tenants to create an environment with materials and styles which were sympathetic to the building's heritage.

To prevent major disruption to the tenants, Proici carried out works in phases and out of normal operational hours. The works included:

- Cubicles
- Sanitaryware
- Plumbing
- Lighting
- Electrics
- Ceilings
- Floor/Wall Tiling
- Decoration
- Joinery
